

Rehabilitation

Mudgee Vet Hospital offers a specialty holistic physiotherapy service to rehabilitate injured pets.

Holistic Therapy

Veterinary Rehabilitation is an emerging field where therapeutic modalities are used to help reduce pain, restore function and mobility and improve the overall quality of life in our pets. Essentially, we use the same therapeutic principles physiotherapists use to help people to recover from injuries and surgery.

Our accredited veterinarian Dr. Genevieve Liebich holds dual qualifications in the field of Physiotherapy and Veterinary Medicine, and offers a holistic approach to managing pet's musculoskeletal and neurological conditions.

Almost every pet suffering from a chronic inflammatory disease or recovering from an injury can benefit from Veterinary Rehabilitation.

Our Services
